Professional Summary

Information Science and Engineering student with hands-on experience in Python, Java, SQL, and web development. Experienced in developing applications using React, FastAPI, and MySQL, along with machine learning projects. Interested in software development, backend development, and applying technology to solve real-world problems.

Education

Bahubali College of Engineering	2023 – 2027
<i>Bachelor of Engineering in Information Science and Engineering (CGPA: 8.7)</i>	Shravanabelagola, Karnataka
Holy Redeemer Composite PU College	2023
<i>Pre-University Course (PUC) – 90%</i>	Karnataka
Holy Redeemer High School	2021
<i>Secondary School Leaving Certificate (SSLC) – 71%</i>	Karnataka

Projects

SmartAttend | React, FastAPI, MySQL

- Developed a location-based attendance management system using React, FastAPI, and MySQL.
- Implemented student registration, login, attendance marking, and admin dashboard features.
- Created backend APIs to manage student details and attendance records.
- Integrated the frontend with the backend to provide a complete attendance management workflow.

Amazon Backend | Python, FastAPI, MySQL

- Developed a backend application using Python, FastAPI, and MySQL.
- Implemented REST APIs for customer registration and application functionality.
- Integrated MySQL database to store and manage application data.
- Tested API endpoints and worked on backend integration and error handling.

Recommendation System | Python, Machine Learning, ChromaDB

- Developed a recommendation system using Python and machine learning techniques.
- Worked on data processing and preparing data for recommendation generation.
- Used ChromaDB to store and retrieve vector representations for recommendations.
- Worked on generating personalized recommendations based on user or item information.

Re-Imagine | Python, Machine Learning, Tkinter

- Developing an AI-based system to identify learning gaps in STEM education.
- Collecting and analyzing student quiz performance data.
- Working on machine learning techniques to identify areas where students need improvement.
- Designing a Tkinter dashboard to display learning gaps and recommendations for students and faculty.

Technical Skills

Programming Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript, React

Databases: MySQL, MongoDB, ChromaDB

Tools: Git, GitHub, VS Code, Docker

Frameworks: FastAPI

Areas of Interest: Software Development, Full Stack Development, Backend Development, Machine Learning, Artificial Intelligence

Languages

English, Kannada, Hindi
